Re-Alignment Committee Recommendation

Below is the recommended proposal for the Southern Conference Re-Alignment beginning with the 2006-07 school year. Discussion centered around two different philosophical proposals the traditional league structure and the equity league structure. The sub committee voted to continue to use the traditional league structure which is the way the Southern Conference in currently configured.

The committee considered many sub mitted proposals regarding the placement of the schools within leagues and the committee applied the realignment criteria to rank the proposals. The committee utilized the collective experience within the committee along with considerable input from the stakeholders. This decision was based on what best fit the existing needs of the student athletes in the entire Southern Conference.

Rationale for selecting this proposal:

All the Salinas schools are in the same league
All PVUSD are in the same league
Enrollment numbers are similar
Geographical location is reasonable
League numbers are balanced
Strength of schools programs is similar
Similar sports competed in are similar
Traditional rivalries are close
